PRESS RELEASE

At the specific request of the Town of Falmouth, the Massachusetts Department of Environmental Protection (DEP) conducted follow-up, daytime sound sampling of Falmouth Wind Turbines #1 and #2. These DEP daytime sound samplings occurred on May 31, June 5, June 12 and June 20 at various residential locations in close proximity to the Town's wind turbines. The daytime sound testing was conducted during the hours between 9:00AM and 4:00PM when there is the least background sound from other sources. A Report on this daytime sound sampling has now been released. The result of Mass DEP's sound sampling indicates that, during the daytime period, the combined recorded sound levels from both wind 1 and wind 2 operating simultaneously do not exceed the 10 dBA differential between recorded sound and background sound established by DEP Regulations.

Julian M. Suso
