August 13, 2019

Eastern Equine Encephalitis virus has been identified in mosquitoes from three different test sites collected by the Cape Cod Mosquito Project. Area truck spraying has been scheduled for Wednesday, August 14, beginning at 8:00pm and ending by midnight. In the case of rain, the alternate spray date will be Monday, August 19. The spraying will be conducted by the Central Mass Mosquito Control Project, and they will be accompanied by employees of the Cape Cod Mosquito Control Project. The truck will have flashing yellow lights signaling its approach, and residents are asked to go inside and shut all windows for approximately 20 minutes when the truck is treating your street. Below is a list of the streets that will be included in the spray route:

ALLEN AVE	GEORGE ST	MOORLAND RD	SEAGULL LN
